

Inhaus[®] Meridian floors are among the highest performing floors available. To ensure your floors will look as good as the day they were installed, follow the simple instructions outlined below so you can enjoy them for years to come.

Key Care and Maintenance Criteria

- After installation, the floor should be kept at 30-60% Relative Humidity and between 15°-27° C (59° - 80° F)
- If used with underfloor heating the maximum temperature of the heating system should be 27° C (80° F). Temperature should also be adjusted by a maximum of 2.5° C (3° F) in a 24 hour period.
- Place floor mats and area rugs at main entrances to minimize abrasive debris that may be introduced to the floor.
- Place protective pads under furniture legs and other movable furniture.
- Use protective mats under wheeled office-type chairs.
- In cases of wheel chair use take care to remove embedded debris from tires when entering the home and use protective mats under high use areas.
- Avoid using lacquers, polishes, waxes or detergent-based cleaners as they will leave a film/residue on the surface of your floors and may cause damage beyond repair. The surface of Elandura flooring does not require refinishing and will maintain its original appearance.
- Never use abrasive cleaners on your laminate floors.
- Never flood your floor. Using excessive liquid on your floor may allow moisture to penetrate through the joints of the flooring.

Daily Cleaning Guidelines

- For daily cleaning, use a dust mop or vacuum with hard surface attachment to remove dust, loose dirt or debris.
- For more thorough cleaning, where a cleaning solution may be required, use a water-based floor cleaner. Alternatively, you can make your own cleaner by combining 1 cup of vinegar to 1 gallon of warm water, or 1/3 cup of ammonia to 1 gallon of warm water.
- To apply cleaner to the floor we recommend using a misting bottle, applying the cleaner to an area and then wiping with a cloth or mop.
- To remove more stubborn stains, put acetone (nail polish remover) onto a cotton swab or cloth and gently rub the stained area.
